

# PROTECT NEWBORNS FROM HEPATITIS B AND LIVER CANCER

## FOR NEWBORNS OF HBsAg-POSITIVE MOTHERS

---

- Give 2 shots at birth:
  - Hepatitis B vaccine
  - Hepatitis B Immunoglobulin (HBIG)
  
- Remind the mother to inform the baby's pediatrician to:
  - Complete the vaccine series
  - Get baby tested at 9-18 months to see if the baby is protected
  
- Remind the mother to see a doctor for long term care of her chronic hepatitis B
